

Eco Web App – Advanced Feature & Design Blueprint

Master Structure: Hero dashboard, live metrics, AI suggestions, community feed, rewards, contribution upload.

Rainwater: harvesting calculator, rainfall animation, water savings tracker.

Solar: solar ROI calculator, sunlight tracker, energy generation UI.

Eco Waste: segregation score, compost tracking, recycling gamification.

Climate: AQI monitoring, health insights, pollution visualization.

Electricity: usage analytics, cost tracker, efficiency suggestions.

Reforestation: tree mapping, CO2 absorption stats, growth visuals.

Gamification: badges, leaderboard, missions, streaks.

Pro Features: AI recommendations, predictive analytics, map heatzones, real-time alerts, IoT integration, blockchain badges.
